DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of an in-line roller skate having heel and ankle bracing in class 280, subclass 11.36:

Species Group A. Fig. 1;

Species Group B. Fig 13;

Species Group C. Figs 15-17.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3618

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Upon election of **one** of the species above, **further restriction** is required as set forth below.

Restriction to **one** of the following sub-species of the heel and ankle bracing inventions is required under 35 U.S.C. 121:

- I. Figs. 2-4, and 14;
- II. Fig. 5;
- III. Fig 6;
- IV. Fig 7;
- V. Fig. 8;
- VI. Fig. 9;
- VII. Fig. 10;
- VIII. Figs. 11-12.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP

§ 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. A telephone call was placed to the attorney of record in the case, Mr. Ryan E. Dodge, Jr., Reg. No. 42,492 on March 29, 2004 to request an oral election to the above restriction requirement. However, Attorney Dodge requested that a written restriction requirement be provided.
